

Making a Mold

1) Start with equal amounts of white and yellow Amazing Mold Putty.

2) Mix the putty together until a uniform yellow color is achieved (time to complete 1 minute).

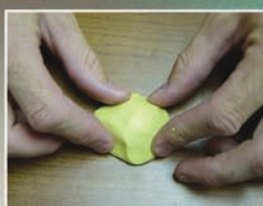

3) Roll the mixed putty into a ball to eliminate all the creases.

4) Starting from the highest point, begin to roll the putty over your item.

5) Continue to roll the putty around your item until you've covered all the detail.

6) Let sit for 20 min. & remove the original piece from the now flexible mold.

Made in the USA

Casting a Piece

1) Using the cups provided, measure equal amounts of the Amazing Casting Resin.

2) Pour the equal amounts of resin into a paper or wax-coated cup.

3) Mix vigorously until a uniform clear color is achieved (time to complete 1 minute).

4) Slowly pour the mixed resin into your flexible rubber mold.

5) Resin begins to cure after 2 minutes. Once resin hardens, flex mold & remove cast piece.

6) Use your mold over and over to create multiples of your original.
